

(MUD HOG - BUILT FOR THE BRANDS YOU DRIVE)

Since 1976, Mud Hog rear wheel drive systems have provided outstanding technology for combines, grain carts, and other self propelled farm equipment.

Mud Hog has a custom-engineered solution for nearly every combine brand, including Case IH, New Holland, John Deere, Gleaner, Challenger, Massey Ferguson and CLAAS.

- Main supplier for most OEM installed RWD systems
- Quick and economical installation
- Can be factory installed on most brands
- On the go, in cab switch control
- Two speed option

Thousands of equipment dealers throughout North America can install your Mud Hog four-wheel drive system. What's more, every Mud Hog comes backed by a comprehensive warranty and a dedicated customer service team that's located inside our Brookston, Indiana headquarters.

(MUD HOG - NOT JUST FOR MUD)

The first and only technology of its kind, Mud Hog four-wheel drive systems are engineered to power your combine through wet, muddy conditions unlike anything else on the market today. Still, there are many additional benefits a Mud Hog can deliver in all climates – wet or dry – allowing you to:

- Harvest faster, with increased speed and traction in any weather
- Experience increased fuel efficiency
- Reduce soil compaction, helping to maximize yields
- Extend the life of your hydrostatic transmission
- Enjoy improved handling and steering control
- Access additional torque for steep grades
- Decrease front tire wear
- Minimize field tracks and ruts
- Adjust your axle height and width
- Improve the resale value of your machine
